FIRE SAFETY AWARENESS IN THE WORKPLACE

Organisations have a legal duty to manage the risks from fires

The Law expects you fulfil the new Occupational Health & Safety Act 2007 and Fire Risk Reduction Rule 2007. Do you know if you have a problem in this area? We can help you find out.

Factories and Other Places of Work Act (Fire Risk Reduction) Rules 2007 The subsidiary legislation has gone further in giving orders to the occupiers such as:-

(i) Formation of fire fighting teams
(ii) Training on fire safety
(iii) Fire drills
(iv) Fire safety policy
(v) Fire safety audit

Course objectives

This intensive three-day course provides an overview of health and safety legislation relating to Fire Risk Reduction, as in the Fire Rules 2007. Delegates will learn about the effects of fire losses, how to identify risks, manage and conduct internal investigation. A fire drill is conducted at the end of the session.

Course content

See attached Course content.

Who should attend?

The course is ideal for people who are concerned with or who have responsibility for managing asbestos in the workplace, including:

- Directors
- Managers
- Supervisors
- Team leaders
- Occupational health professionals
- Human resources professionals
- Safety professionals/representatives
- Surveyors and architects
- Facilities managers

MEDIC24 is your professional Occupational Health and Safety Partner and Trainer
